PROFESSIONAL ACHIEVEMENT RELATIVE TO MEXICAN-AMERICAN STUDIES

Fall 2020 – Present   Program Development, South Plains College

Mexican-American Studies Program to Associate's of Arts in Mexican-American Studies

- Exposed opportunities to implement and expand a MAS program at SPC from needs assessment results. With the authorization of administrators, I spearheaded the collaboration of a team of faculty who could teach within the umbrella of a Mexican-American Studies program at SPC and in tandem with institutional relationships at Texas Tech University. I managed and refined the program timeline from establishing a field of study to the conception of an associate's degree based on student and institutional needs, data, and goals. Full implementation is projected for fall 2022. Long-term goals include creating, sustaining, and expanding a supportive academic pipeline for students across institutions.

01/2019 – Present   Course Development, South Plains College

Intro. to Mexican-American Studies face-to-face, hybrid, and online course development

- I develop and manage curriculum to provide instructors across sections with assistance in creating and maintaining a standardized course experience. Curriculum is developed to support all student learners, including bilingual learners, while maximizing accessibility in multiple delivery formats. Material provides an engaging and rich course experience where course objectives are learned from lecture discussion to assessment to professional applications.
